Teentech 2019 - *CONNECTING GIRLS AND TECHNOLOGY*

Teentech is a project of the American Association of University Women New Jersey (AAUW NJ) in collaboration with various New Jersey colleges/universities. Teentech is designed to encourage young women to further their education in **Science, Technology, Engineering, and Math (STEM)** fields.

AAUW's report, ***Gender Gaps***, indicated that young women lag behind young men in acquiring technical proficiencies. The report cites evidence that girls are more likely to use technology when they see its real-world applications. AAUW's research, ***Why So Few?***, documents that women are still underrepresented in high-demand, high-paying STEM careers.

Teentech will be a day of hands-on workshops designed to demonstrate that technology, engineering, and computer science are exciting and relevant. High school girls from all over New Jersey will work together with faculty and students of the host institution to learn and practice technology-based problem-solving in a college laboratory setting. Students must be accompanied by educators who will have their own workshop experience and panel discussion of how to encourage girls to pursue STEM education and career.

AAUW's mission is to advance equity for women and girls through research, education, and advocacy. Our 170,000 members and supporters span local and virtual communities, cities and college campuses. On campuses, we foster the next generation of women in leadership and in the workplace. After graduation, we mentor, fund, and support educational and professional development. From college through career and beyond, we're working to change the future.
